Problem Set 6
due Thu., March 27th in class
$\mathbf{R}^{\begin{array}{l}\text { Decisions, Games \& } \\ \text { ationAL CHOICE }\end{array}}$
(In class or my mailbox beforehand)

Exercise 1 ( 15 pts.) List the pure strategy Nash equilibria in the following zero-sum game. You don't need to show your work.

| Row | Column |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | C1 | C2 | C3 | C4 |
|  | R1 | -4 | -5 | -4 | -5 |
|  | R1 | 4 | 5 | 4 | 5 |
|  | R2 | -4 | -6 | -4 | -6 |
|  |  | 4 | 6 | 4 | 6 |
|  | R3 | -3 | -7 | -2 | -7 |
|  | R3 | 3 | 7 | 2 | 7 |
|  | R4 | -2 | -7 | -3 | -9 |
|  |  | 2 | 7 | 3 | 9 |

Exercise 2 ( 15 pts.) Find expected utilities of both Row and Column in this mixed strategy profile for the following game. Show your work.

$$
\left\langle\left(\frac{1}{3}\right) \text { Left } ;\left(\frac{2}{3}\right) \text { Right },\left(\frac{1}{2}\right) U p ;\left(\frac{1}{2}\right) \text { Down }\right\rangle
$$

| Row | Column |  |  |
| :---: | :---: | :---: | :---: |
|  |  | $U p$ | Down |
|  | Left | ${ }_{3}{ }^{1}$ | $2^{2}$ |
|  | Right | $2^{0}$ | $1{ }^{3}$ |

Exercise 3 (20 pts.) Find the mixed strategy Nash equilibrium for the following game. Show your work.
